Contractor Comments	Response/Reference Document
1. BOQ item 2, under Dredging and Filling requires 6,500 m ³ of fill material. Can you identify the borrow are for this filling material.	Borrow area can be identified with consult with council at a later date. This can be ensured with EIA process as well. Contractor to determine a suitable area within EIA process
2. BOQ item 3.1.3, under Construction of concrete curb and screed; allow for levelling and compaction, the quantity is stated as zero. Does this mean that the curb and screed is not required along the revetment ?	Curb and screed not a requirement as the value mentioned is zero
3. BOQ item 3.1.2, the length of the revetment is given as 342 m, however in the drawing the sum of the 2 revetment sections is 322 m (170 m & 152 m). which is the correct length?	Revised BOQ attached, correct figure is 170m (152m is for phase 2)
4. Has the EIA for this project been done? if so can you share the document as it will be required to price the BOQ items 1.6.1 and 1.6.2	not required for tender process
5. Specification for the Geotextile is not included in the document.	Specification of Geotextile to be taken as BS EN 13253:2001 or later Geotextiles and geotextile-related products - Characteristics required for use in erosion control works (coastal protection, bank revetments). Specified in the initial shore protection specification document
6. Is there a bathymetry available for the proposed project area.	not available
7. Can you identify the material storage area and the campsite on the drawing.	Storage areas and campsite provision can be made with consult from the local governing authority/council as those areas are allocated for the purpose of awarded projects without incurring additions to the awarded contract. An adequate location shall be allocated once contractual agreement can be made as site conditions and availability may differ from time of tender to time of mobilization. As such, assured allocated locations shall not be shown in the drawing at the time of tender,

yet made available once project is awarded. Bill of quantities calls for quoting for site setup and operations in such allocated areas under Preliminaries
