

SH. FUNADHOO JUNIOR COLLEGE – SITE ASSESSMENT

1. Site Location and Plot Size

The proposed location is well within the island and an area of 17,500sq.ft.

2. Current Site Condition

- The site is presently overgrown with medium to large-sized trees, bushes, and ground-level vegetation.
- There are no standing structure exists on-site, therefore **no demolition works** are required.
- Ground surface is stable and suitable for temporary setups and mobilization.

3. Temporary Facilities and Utilities Availability

- The combined land area offers sufficient space for setting up **temporary facilities**, such as:
 - Contractor/staff accommodation/ Site office (temporary)
 - Material storage zones
- **Electrical infrastructure** is located nearby, making it feasible to obtain temporary power connections for construction activities.

4. Accessibility and Infrastructure

- The site is accessible via internal roads from 3 sides.
- Proximity to the **jetty** provides logistical advantages for the delivery of construction materials and equipment.
