	1	<p>SEV.65.65.22.2.50D</p>  <p>Note! Product picture may differ from actual product</p> <p>Product No.: 96047697</p> <p>Highly advanced pumps with many unique features. The Grundfos SEV ranges are technologically advanced pumps designed for handling wastewater, process water and unscreened raw sewage in heavy-duty municipal utilities and industrial applications. These heavy-duty pumps are built for years of trouble-free operation in the most demanding applications. The pumps may be installed submerged or dry without motor cooling; in either case they are extremely reliable and very easy to service. The efficient SuperVortex impellers provides free passage of solids up to 100 mm. This greatly reduces the risk of clogging and ensures maximum up-time and reduced operating costs.</p> <p>Advanced technology inside out The Grundfos SEV pumps feature advanced technology inside out. In spite of their good looks, these highly efficient pumps are designed for years of trouble-free operation in the toughest environments. Easy to install and easy to service, the SEV pumps ensure low long-term operating costs.</p> <p>Watertight cable connection Polyurethane-filled stainless steel cable connection, hermetically sealed. Ensures that liquid cannot penetrate through the cable into the motor.</p> <p>Short rotor shaft Compact motor construction with short rotor shaft reduces vibrations. Increases efficiency and lifetime of shaft seal and ball bearings.</p> <p>Liquid-less motor cooling Solid-block stator housing with built-in cooling conduits, which efficiently transfer excess heat to pumped liquid via a solid cast intermediate cooling flange. This allows for continuous operation even in a dry installation.</p> <p>Double mechanical shaft seal Efficient single-unit cartridge shaft seal system ensures longer operating time and less down-time. Easy to replace in the field without use of special tools.</p> <p>Stainless steel motor jacket Extremely robust impact-resistant stainless steel motor-housing jacket, with an easy-to-clean smooth surface.</p> <p>Stainless steel clamp Unique stainless steel clamp assembling system enables quick and easy disassembly of pump from motor unit. No tools required. Provides easy access for service and inspection.</p> <p>Modular design Each motor size fits several pump sizes with SuperVortex hydraulics.</p> <p>Operating conditions The Grundfos SEV pumps are suitable for continuous submerged operation with a liquid level just above the pump housing, or in a dry installation without separate motor</p>	Price on request
