CLARIFICATION 01

No.	Section / Document	Bidder's Query	Response
1		<p>Looking for the best process design I would like to know if would be possible to get further information about the material:</p> <ul style="list-style-type: none"> ● Characterization on the input. ● Grain size distribution of the input. ● Humidity content of the input (I can see in the tender some information about the climate and rainfall situation but I not specifically of the material). <p>Civil Works. Can you clarify the scope of supply on this point? It is included in the scope of supply?</p>	<p>Additional to the information provided in the technical specifications <u>please find attached</u> the result of the C&D survey undertaken during 2016-2017. The bidder is required to estimate the grain size distribution on his own based on the provided information and his own professional knowledge. The humidity content of the material could be considered as negligible</p> <p>Civil works: Construction of an adequate roof (fitting the supplier's designed equipment) including all necessary stairs, walking platforms, protection measures and electrical connection. Not part of the scope of work: Concrete slab (will be provided by the Employer through another contract)</p>
2	Section 6 – 1 – Scope of supply of plants and services	Roof. I can see in page number 2: Shall we consider and offer only the design of the roof? Not the execution? Anycase we would need further information about the requested design.	Please consider the design and the execution of the roof as the design should be developed by the supplier to fit to the equipment supplied. Therefore, the design and the execution of the roof is part of the supplier's obligation (construction could be sub-contracted of course)
3		Regarding this bidding, May I attend this as a JV body to bid this project? for example, AI Power will invite SH Electrical Company as a Joint Venture (or Sub-contractor) to provide service to this project? even if AI Power is a new private company registered 1.5 Mil\$ and SH Electrical Company is a state-owned joint company.	<p>Please refer to the following sections of the bidding documents:</p> <p>Eligibility of bidders - Section 1 clause 4</p> <p>Qualification criteria - Section 3 point 2</p>
